NetSuite & SOX Compliance Standard Baseline

Standard Configuration & Control Framework

Document Version:	Version 4.2	**Effective Date:**	October 2026
Framework Scope:	Procure-to-Pay (P2P), Vendor Governance, and Segregation of Duties		

1. Procure-to-Pay (P2P) Control Mandates

Control ID: P2P-01 (Mandatory 3-Way Match): All purchase-order-based disbursements must undergo automated 3-way matching (Purchase Order, Item Receipt, and Vendor Bill) within the NetSuite ERP environment prior to payment release. Manual overrides without audit logging are prohibited.

2. Segregation of Duties (SoD) & Approvals

Control ID: P2P-02 (Approval Hierarchies): System-enforced approval workflows must restrict purchase order creation and bill approvals to authorized user roles. Users creating purchase orders cannot approve the corresponding vendor bill.

3. Vendor Master Data Governance

Control ID: VMD-01 (Vendor Onboarding): Vendor creation and banking detail modifications must be processed through an authenticated portal with mandatory tax ID validation, duplicate checking, and secondary compliance sign-off.
